## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Current Investment Indicators Section,  
Science, Technology and Capital Stock Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9689) or to the Statistics Canada reference centre in:

|            |            |                |            |
|------------|------------|----------------|------------|
| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
| Halifax    | (426-5331) | Winnipeg       | (949-4020) |
| Montréal   | (283-5725) | Regina         | (359-5405) |
| Ottawa     | (990-8116) | Edmonton       | (420-3027) |
| Toronto    | (973-6586) | Vancouver      | (666-3691) |

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des indicateurs courants de l'investissement,  
Division de la science, de la technologie et du stock de capital,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9689) ou au centre de consultation de Statistique Canada à:

|            |            |                |            |

## Introduction

Statistics Canada conducts a monthly survey of building permits issued in Canada. The material contained in this publication is compiled from data supplied by the issuing municipalities and therefore, varies from municipality to municipality with the terms of each individual by-law, with the methods of estimating the value of construction for permit issuing purposes and with the diligence with which the terms of the by-law are applied. Information is not available on the permits allowed to lapse without the work for which the permit was issued being completed.

This publication presents statistics on building permits issued during the month for each municipality reporting in the survey. Totals are available for provinces, for metropolitan areas, for economic regions, for counties and finally for the country as a whole. Area totals are the sum of the reporting municipalities and there is no allowance for municipalities not covered in the survey and for municipalities issuing permits but not reporting in the survey for the month in question. In some cases, reports from municipalities are received too late to be included in the relevant compilation; these municipalities are listed in the publication of the following month and a revised summary of building permits by county, by province and for Canada as a whole is made available in that month.

## Nature of Classification

This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued for: construction of new buildings; alterations, additions, conversions or structural changes to existing buildings; installation of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

Minor repair jobs such as painting, tiling, roofing etc., made to existing buildings in order to return them to their previous states are not included in the building permits series. Estimates of such repair work may be obtained from the publications *Construction in Canada*<sup>1</sup> and *Private and Public Investment Outlook*.<sup>2</sup>

<sup>1</sup> *Construction in Canada*, Catalogue 64-201, Annual.

<sup>2</sup> *Private and Public Investment Outlook*, Catalogue 61-205, Annual.

## Introduction

Statistique Canada effectue chaque mois un relevé des permis de bâtir émis au Canada. Les renseignements contenus dans la présente publication proviennent des données transmises par les municipalités qui émettent des permis; la statistique varie donc d'une municipalité à l'autre selon le règlement propre à chacune, selon les méthodes d'estimation des valeurs de construction appliquées aux fins d'émission des permis et selon la diligence avec laquelle les règlements eux-mêmes sont mis à exécution. On ne dispose d'aucun renseignement au sujet des permis pouvant déchoir sans que le travail prévu ait été exécuté.

La présente publication fournit la statistique des permis de bâtir émis au cours du mois par chaque municipalité participant à l'enquête. Des totaux figurent dans le cas des provinces, des zones métropolitaines, des régions économiques, des comtés et pour le Canada entier. Les totaux régionaux représentent la somme des chiffres fournis par les municipalités faisant rapport; ils ne tiennent pas compte des municipalités non comprises dans l'enquête, ni des municipalités qui émettent des permis mais qui n'ont pas fait rapport pour le mois en cause. Dans certains cas, les rapports de la municipalité parviennent à Statistique Canada trop tard pour qu'on puisse les inclure dans le calcul pertinent; en pareil cas, les données paraissent dans la publication du mois suivant, et l'on publie, ce mois-là, un sommaire révisé des permis de bâtir, par comté, par province et pour le Canada entier.

## Nature de la classification

La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments; travaux de modification, rajout ou transformation; installation d'appareils de chauffage, de plomberie et autres commodités du genre, érection d'enseignes, d'affiches, de marquises, etc. et autres améliorations d'immeubles.

Les travaux de réparation qui sont destinés à rétablir un bâtiment dans son état initial (travaux de peinture, réfection de plancher, de toiture, etc.) ne sont pas compris dans la statistique des permis de bâtir. On peut toutefois obtenir une estimation de ces travaux en consultant *Construction au Canada*<sup>1</sup> et *Perspectives des investissements privés et publics*.<sup>2</sup>

<sup>1</sup> *La construction au Canada*, n<sup>o</sup> 64-201 au catalogue, annuel.

<sup>2</sup> *Investissements privés et publics, Perspectives*, n<sup>o</sup> 61-205 au catalogue, annuel.

## Residential

The classification for residential construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing dwellings.

**Number of units** shown under Residential construction indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

**Single** residential units are structures containing only one dwelling unit completely separated from any other dwelling or structure.

**Cottages** are seasonal dwellings such as summer homes and house-boats.

**Double** residential units are dwellings found in structures containing two dwelling units such as semi-detached dwellings.

**Row** dwellings are one-family dwellings in a structure of three or more attached dwellings.

**Apartments** include all multiple housing units such as duplexes, triplexes, quadruplexes, row duplexes as well as apartments proper. Flats, regardless of number, which are part of a non-residential structure are also included.

**Conversions** consist of dwelling units added by conversion of existing structures.

## Non-residential

The classification for non-residential buildings or structures is divided into three major groups pertaining to the use of the structures for industrial, commercial and government and institutional purposes.

**Industrial.** Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

**Commercial.** Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial - signs, posters, heating and plumbing installations, etc.

## Construction domiciliaire

La classification des bâtiments domiciliaires a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

**Nombre d'unités**, qui paraît sous la rubrique Construction domiciliaire, correspond au nombre d'unités de logement indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées.

**Logement simple** s'entend des habitations à logement unique et indépendant de tout autre logement ou bâtiment.

**Chalet** s'entend de toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

**Logement double** s'entend de toute maison d'habitation à deux logements comme les maisons jumelées.

**Logement en rangée** s'entend de tout logement unifamilial compris dans un bâtiment formé d'au moins trois logements côte-à-côte.

**Logement d'appartements** s'entend de toute habitation comprise dans un bâtiment qui contient plusieurs unités, notamment les duplex, les triplex, les quadruplex, les duplex en rangée et les appartements proprement dits. Quel qu'en soit le nombre, les plain-pied qui font partie d'une construction non domiciliaire sont également comptés.

**Transformation** comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

## Construction non domiciliaire

La classification des bâtiments non domiciliaires comporte trois groupes principaux fondés sur les destinations suivantes des immeubles: industrielle, commerciale et institutionnelle ou gouvernementale.

**Construction industrielle.** Comprend tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique, à l'agriculture, à la sylviculture, à l'exploitation minière, y compris les installations de traitement des minéraux à la mine.

**Construction commerciale.** Comprend les magasins, entrepôts, garages, immeubles de bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses - enseignes, affiches, chauffage, plomberie, etc.

**Institutional and government.** Includes expenditures made by the community, public and government for buildings and structures - schools, universities, hospitals, clinics, churches, homes for the aged, government office and administration buildings, law enforcement, public protection, national defence, and ancillary buildings such as dormitories, residences, church rectories, gymnasiums, heating plants, laundries and cafeterias for hospitals, schools and universities.

## Basis for Classification

Classification of structures into major groups and sub-groups is dependent upon: the intended use of the structure in case of new buildings; the present or intended use of the building to which repairs and other improvements are being made; affiliation of the structure where the proposed structure is to provide ancillary facilities to the existing buildings; the principal use of the building where the intended use of the building is for more than one purpose.

On the building permit forms, the municipality reports; name and address of applicant (owner or agent); location of construction; intended use of the building - factory, school, church, etc.; class of work done - new, repair, etc.; the value of the proposed construction; and in case of residential construction, number of dwelling units created.

The description given as to the intended use of the building, forms the basis for classification. If the structure is a new building or conversion it is classified according to its intended use such as a factory, school, church, hospital, etc. Where the expenditure is of a repair nature, including all improvements to the property, alterations and additions, it may be classified as to the present use of the building, to which repairs are made or its intended use. If the repair construction consists of installation of heating plumbing or other such facilities, it will be classified as to the present use of the building. Where it includes an addition, such as a warehouse, to a store, it will be classified to its intended use.

Where the new or repair construction for institutional and government purposes provides additional facilities for existing buildings, these are classified according to the intended use of the existing structures. Examples are heating plants, cafeterias, nurses' residence for hospitals; dormitories, gymnasiums, libraries for universities; ancillary structures on prison farms, on Armed Force bases, etc.

A structure may have more than one intended use and therefore fall into more than one classification, and may be classified as to the principal use of the structure, or the value of proposed construction may be divided into more than one appropriate category. Where part of the structure is to provide additional facilities, whose value in

**Construction institutionnelle et gouvernementale.** Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers pour vieillards, bureaux de gouvernement ou d'administration publique, services d'application de la loi, de protection du public, de défense nationale; enfin des bâtiments auxiliaires tels que dortoirs, résidences d'employés de service, presbytères, gymnases, chaufferies, buanderies et cafétérias d'hôpitaux, d'écoles ou d'universités.

## Fondement de la classification

La classification des bâtiments en groupes et sous-groupes principaux se fondent sur les éléments ci-après: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des réparations ou améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'immeuble où la construction projetée est destinée à plus d'une fin.

Sur la formule de déclaration des permis de bâtir, la municipalité inscrit: les nom et adresse du requérant (propriétaire ou agent); l'emplacement de la construction; la destination de l'immeuble - manufacture, école, église, etc.; la catégorie de travaux en cause - construction nouvelle, réparation, etc.; la valeur de la construction projetée et, dans le cas des constructions domiciliaires, le nombre d'unités de logement créé.

La description fournie relativement à l'utilisation éventuelle de l'immeuble constitue le fondement de la classification. S'il s'agit d'un nouveau bâtiment ou d'une transformation, l'ouvrage est classé selon sa destination - manufacture, école, église, hôpital, etc. Lorsque la dépense a pour objet des travaux de réparation, y compris toutes améliorations de propriété, modifications et rajouts, son classement peut s'effectuer en fonction de l'emploi que l'on fait déjà du bâtiment existant ou de la fin à laquelle on le destine. Si les travaux consistent en l'installation d'un système de chauffage, de plomberie ou d'autres commodités du genre, on les classe selon la fin à laquelle le bâtiment sert déjà. Lorsque les travaux comprennent un rajout, par exemple l'addition d'un entrepôt à un magasin le classement se fait d'après l'utilisation projetée.

Dans le cas où les travaux neufs de construction ou de réparation effectués à des fins institutionnelles ou gouvernementales doivent assurer des commodités supplémentaires à des bâtiments existants, ces travaux sont classés d'après l'usage que l'on se propose de faire de l'immeuble existant. Voici des exemples pertinents: chaufferies, cafétérias, résidences d'infirmières pour hôpitaux; dortoirs, gymnases, bibliothèques d'universités; constructions auxiliaires dans des fermes-prisons ou dans les bases des Forces Armées, etc.

Étant donné qu'une même construction peut être destinée à des fins multiples, elle peut entrer dans plus d'une classe; il est possible, en effet, de classer pareille construction d'après sa destination principale, ou de répartir la valeur des travaux entre diverses catégories appropriées. Si une partie de l'immeuble a pour objet d'assurer des commodités supplémentaires dont la

relation to the principal use of the structure is relatively small, it will be classified as to its principal use. If the structure is a store and apartment, store and office building, restaurant and office building, etc., the value of the proposed construction may be divided among the appropriate classifications. However, where the principal use of the structure is a shopping centre but provides additional facilities such as banks, restaurants, etc., it will be classified as stores - the principal use of the structure.

## Coverage

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population. Regular users of this publication will note that the table on page xi reflects the coverage in terms of the 1981 Census population. For the purpose of approximating the coverage of the Building Permits Survey, the breakdown of the population into rural and urban areas is based on the rural-urban definition shown in the official 1981 Census. The urban population in 1981 consisted mainly of the population residing in cities, towns and villages, whether incorporated or not, and the "urbanized" or built-up residential fringes having a minimum population of 1,000 population and a density of at least 1,000 per square mile. The rest of the population was classified as rural.

In this publication, Metropolitan Areas are based on the 1981 Census definitions. They are defined as the main labour markets of a continuous builtup area having a population of 100,000 or more, corresponding to a commuting field or a zone where people could normally change their place of work without changing their place of residence. Although the 1981 Census defined Ottawa-Hull as a single metropolitan area, this publication treats this area as two distinct entities in their respective province.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country. Larger projects of a utilitarian character such as hydro-electric developments, filtration plants, pipelines, highways do not generally require building permits, and frequently large industrial plants are constructed outside the boundaries of a building permit issuing municipality.

## Index of Building Construction

Building permits represent one of the first steps of the construction process. They express investment intentions of various economic agents and therefore lead any labour and material expenditures. However, due to the existence of seasonality and extreme building permits values, it is difficult to infer any real changes in the behaviour of economic agents. In tables IV and V,

valeur, par rapport à l'utilisation principale de l'immeuble, se révèle passablement faible, les travaux seront classés en fonction du principal usage de l'immeuble lui-même. S'il s'agit d'un bâtiment formé d'un magasin et d'un appartement, d'un magasin et de bureaux, d'un restaurant et de bureaux, etc., la valeur de la construction projetée peut être répartie entre les diverses catégories appropriées. Cependant, si une construction sert surtout de centre commercial tout en offrant des services supplémentaires (banques, restaurants, etc.), on la classe parmi les magasins, ce qui correspond en l'occurrence au principal emploi de ladite construction.

## Couverture

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale. Les usagers de la présente publication remarqueront que le tableau de la page xi donne un aperçu de la couverture de l'enquête en termes de la population du recensement 1981. Afin d'avoir une approximation de la couverture de l'enquête sur les permis de bâtir, la répartition rurale-urbaine de la population se fonde sur celle qui a été utilisée lors du recensement de 1981. La population urbaine en 1981 comprenait celle des cités, villes et villages de 1,000 habitants et plus, constitués ou non, et des zones "urbanisées" ou bâties à la périphérie, ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Le reste de la population était classée rurale.

Dans le présent rapport, les zones métropolitaines sont délimitées par les définitions du recensement de 1981. Elles sont définies comme le principal marché de travail d'une zone habitée continue ayant une population d'au moins 100,000 habitants, correspondant à une zone de déplacements quotidiens, soit celle dont les habitants pourraient normalement changer de lieu de travail sans changer de lieu de résidence. Bien que le recensement de 1981 définisse Ottawa-Hull comme une seule zone métropolitaine, la présente publication traite cette zone comme deux entités distinctes parce que situées dans des provinces différentes.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays. En effet, de vastes entreprises comme l'aménagement d'installations hydro-électriques, de pipelines et de routes ne requièrent pas de permis de bâtir et, bien souvent, de grandes usines se construisent en dehors des limites de toute municipalité émettant des permis de bâtir.

## Indice de la construction

Les permis de bâtir représentent une des premières étapes du processus de construction. Ils expriment les intentions d'investissement des différents agents économiques et par conséquent devançant les dépenses en main d'oeuvre et en matériaux. Cependant dû à la présence de la saisonnalité et des valeurs extrêmes à l'intérieur des séries il devient difficile de distinguer tout changement d'attitude des agents. Aux tableaux IV et V, les

deflated and adjusted data for seasonality already enable a better interpretation of construction activity. Price indexes used to deflate building permit values are the residential and non-residential building construction input price indexes. These composite price indexes are derived from union wage rate indexes and construction material indexes, which are available from the CANSIM databank, matrices 400 and 423. While appropriate for a leading indicator, these deflators are not identical to those utilized in preparing constant dollar estimates of capital expenditures or construction production. In table VI, in order to eliminate irregular movements, a filter is applied to the seasonally-adjusted permits values. With this filtering, the building permits series then becomes a more reliable trend indicator of the economic activity. Unfortunately, such filtering entails a loss of timeliness in warning of cyclical changes.

données désaisonnalisées et dégonflées permettent déjà une meilleure interprétation de la valeur des permis puisqu'elles reflètent le niveau réel des intentions. Les indices de prix employés pour le dégonflement de la valeur des permis de construire sont les indices de prix des entrées dans la construction résidentielle ou non-résidentielle. Ces indices synthétiques sont calculés à partir des indices des salaires syndicaux et des matériaux de construction obtenus de la banque de données CANSIM, matrices 400 et 423. Ces dégonfleurs diffèrent de ceux utilisés lors du calcul des dépenses en capital ou de la production en dollars constants. Au tableau VI un filtre est appliqué aux permis de bâtir afin d'éliminer les valeurs extrêmes ce qui permet d'identifier les mouvements fondamentaux des séries. En lissant le mouvement de la série, celle-ci devient donc un indicateur de tendance beaucoup plus fiable de l'activité économique. Il est à noter qu'une meilleure tendance ne peut être obtenue qu'en sacrifiant un peu d'actualité et c'est la raison pour laquelle les séries sont publiées avec un mois de retard.

## EXPLANATORY NOTE

The letter "L" after the name of a municipality indicates that the report of this municipality was not received on time for publication. If the letter "L" is not present and all columns contain a dash (-), this indicates that a "nil" report was received or that the value of permits issued during the month was less than \$500.

The asterisk before the name of a municipality indicates that it is a Metropolitan Area or an Urban Centre of 10,000 population or a municipality comprised in an urban agglomeration of 10,000 population or more.

All current data are preliminary.

## NOTE EXPLICATIVE

La présence de la lettre "L" après le nom d'une municipalité signifie que Statistique Canada n'a pas reçu de rapport de la municipalité à temps. Si la lettre "L" ne figure pas et que toutes les colonnes renferment un tiret (-), cela signifie qu'un rapport marqué "néant" a été reçu ou que la valeur des permis émis durant le mois en cause était inférieure à \$500.

L'astérisque qui précède le nom d'une municipalité signifie qu'il s'agit d'une zone métropolitaine ou d'une municipalité comprise dans une agglomération urbaine de 10,000 âmes et plus.

Les chiffres courants sont préliminaires.

### Abbreviations Used – Abréviations employées
